

Na a S e S de E a e e (NSSE)

This survey is conducted annually and asks undergraduate students about the quality and characteristics of their higher education experience. The 2023 survey collected responses from 354,067 students from 541 institutions—473 in the U.S., 63 in Canada, and 5 in other countries. Results shown are “top two box” responses, which means they reflect the percentage of respondents who rated institutions most favorably (e.g., good and excellent, often and very often, yes and definitely yes, or 6 and 7 on a scale of 1–7).
